

Completed Project:

Project Report

Project Ref: N/A

Name of Project: Septic Tank construction

Cost of the project: 200 GBP

We are pleased to inform you that the above project that you kindly sponsored has now been completed. It was finished on the 28/01/2004. Please find attached with this report a photo of the completed project.

Local Partner's Report:

The school teachers along with PSD Nepal wrote the proposals. Due to the lack of a proper septic tank in the school, the presence of untreated human waste increases the risk of spreading diseases in the school. At the time of implementation, the school teachers, students and local people actively participated in carrying, rocks, bricks, digging hole, assisting the skilled labour and also they collected some locally available materials.

This kind of program creates awareness amongst the teachers, students and local people as to the benefits of treating human waste in their home and community. This has also helped the school to keep clean and safe from potential infectious diseases. The school and local community will look after the septic tank and make the necessary arrangements for its maintenance.

Community Feedback:

"This small endeavour will make a great change to the school", Head Teacher

"We have now a safe septic tank which is very important to make our school clean and tidy", Student.

"The school would like to share sincere gratitude towards the sponsor of this project. Your kind support towards us is highly acknowledged. I would also like to give many thanks towards the various organizations like PSD Nepal, Just Aid International in their effort on this project. We are always welcoming such initiatives", Community Leader

On behalf of the community who will benefit, many thanks for supporting this project.
